

DSCA News Flash - Transportation

Dear {Contact_First_Name} {Contact_Last_Name},

This News Flash info is provided to members on the **DSCA Transportation Committee** and to individuals who selected the **Topic of Interest = Transportation**.

The DSCA **EV Charger Subcommittee** is being formed and would welcome the suggestions and comments from downtown residents and condo managers regarding Electric Vehicle Charging Stations in downtown condos (multi-unit dwellings) and elsewhere in the downtown area.

You're invited to join the Webinar below for a close look at where the industry is today and what the future of EV holds.

In addition, if you would be interested in joining the EV Charger Subcommittee as we explore the issue in greater depth, please let me know.

Best regards,

Alan Freedman

Chair, DSCA Electric Vehicle Charger Subcommittee

Subject: Webinar: What Is **Vehicle Charging Innovations for Multi-Unit Dwellings** (VCI-MUD)?

Register
Here

The **Vehicle Charging Innovations for Multi-Unit Dwelling (VCI-MUD)** project is a three-year project that began in 2019 with funding from the U.S. Department of Energy's [Vehicle Technologies Office](#). The Columbia-Willamette Clean Cities joins The Center for Sustainable Energy, 12 other Clean Cities coalitions and project partners on this project. This webinar will provide an overview of the project structure, goals/deliverables, and accomplishments to date.

Charging at multi-unit dwellings (MUD) is essential to meeting our plug-in electric vehicle (PEV) goals, but can be the trickiest place to install charging. The project is addressing barriers to MUD charging, through the demonstration of innovation charging technologies and the development of new tools and resources.

Join February 25, 2021 to hear about these exciting efforts and resources that will be available to you.

For Information About Registration, Please Contact Maddy Reznick at:

SPEAKER & PANELIST BIO:

Kevin Wood is a Clean Transportation Specialist at CSE, where he works with a diverse group of public and private stakeholders to expand infrastructure and increase the use of electric vehicles. Kevin also performs outreach and analysis to help fleet operators and consumers make informed decisions about vehicle and fuel options. He manages alternative fuel market development initiatives under California Energy Commission and U.S. Department of Energy programs, executing barrier reduction initiatives, including market assessment, best practices development, training coordination and technical assistance. He also serves as Coordinator of the San Diego Regional Clean Cities Coalition, a partnership of public, private, and non-profit organizations dedicated to increasing the deployment of alternative fuel vehicles in the San Diego region as part of the U.S. DOE's Clean Cities Program. Kevin earned an M.A. in Urban Planning from the Sol Price School of Public Policy at University of Southern California, and a B.A. in Political Science from the University of California, San Diego.

The **DSCA Transportation Committee** provides news about issues regarding Transportation, Traffic, Roundabouts and Sidewalks in downtown Sarasota and surrounding areas.
