

## DSCA News Flash - EV Charging Survey

Dear {Contact\_First\_Name} {Contact\_Last\_Name},

This News Flash info is provided to DSCA members and to individuals who may have interest in the future of Electric Vehicle Charging infrastructures in Sarasota multi-user dwelling structures.

Electric Vehicles accounted for 4.4% of vehicle sales in USA in 2021; which doubled from the year before and projected to quickly grow to nearly 7% soon. Given the increased market for electric vehicles, earlier this year DSCA conducted a survey to gauge the interest among DSCA members in installing electric vehicle charging stations, as well as learning the experience of some who have already done so. The full results of that survey will be sent to DSCA members, but a summary is being made available, which includes these highlights:

- 7 members indicated that their building has already installed electric vehicle charging stations.
- 14 members indicated that they are considering installing such stations.
- All respondents who installed EV charging stations indicated that they are satisfied with the services provided by the primary suppliers and the supplemental vendors, including such factors as speed of installation, price and technical support.
- plus much more ...

The **EV Charging Survey Summary** is available here:

---

Below is an invitation to [DSCA's Workshop: "New Technologies for Condo Associations - Helpful or Hurtful?"](#) One of the key topics in Tuesday's Workshop is around options for how condos and other multi-unit residences can better plan for the growing use of electric vehicles in Sarasota. Some of the DSCA EV Charging Survey will also be discussed during this workshop, along with information on how to assess risk and benefits of other new technologies addressing different issues. We encourage residents and property managers to attend.
